Manufacturer [Ian Johnston Engineering Ltd.](#)

First released back in 2018 I have had many wonderful and fruitful years designing and producing the PDVS2mini and have shipped many throughout the world to individuals and companies alike. It has gained a rather good reputation as a piece of test gear. I'm quite proud of it!

However, from a personal standpoint it's time to move on and as I am in the midst of semi-retirement I'd like to concentrate on other things, my YouTube channel and other projects primarily.

So, I sold the rights to the PDVS2mini to WryTech who now manufacture and distribute the PDVS2mini, click below:
